Canada's Deadly Secret

Saskatchewan Uranium and the Global Nuclear System

Jim Harding, Foreword by Helen Caldicott

272pp ISBN: 9781552662267 \$24.95 Rights: World

Canada's Deadly Secret chronicles the struggle over Saskatchewan's uranium mining, the front end of the global nuclear system. It demonstrates the negative impacts on Aboriginal rights and environmental health, and the effect of free trade, in tracing Saskatchewan's pivotal role in nuclear proliferation with its spread of contamination and cancer. Jim Harding shows that nuclear energy cannot address global warming; nor is there a "peaceful atom." The book goes inside biased public inquiries, exposing pr campaigns of half-truths and untruths, and indicts the penetration of nuclear propaganda into our schools. *Canada's Deadly Secret* also highlights successes in holding back nuclear expansion. It presents an alternative, ecological vision for a sustainable future that not only takes up the invitation coming from renewable energies, but also links energy, environment, health, peace and sovereignty.

Contents: Foreword by Helen Caldicott • Preface: Telling the Story as it Unfolded • Introduction: One World, One Future • Side-Stepping Social Impact and Aboriginal Rights: Cluff Lake Inquiry • NDP Government Disinformation Campaign: Uranium Secretariat • Challenging Nuclear Scientism: Warman Uranium Refinery Hearings • Uranium Blowback: Boycott, Policy Flip-Flop and Spills • The Corporate Agenda: Profitable Uranium and Nuclear Comeback Strategy • Free Trade and Sovereignty: The Uranium Connection • Northern Opposition Mounts: Another Spill, Collusion Backfires • The National Film Board Releases "Uranium" in the North • Drawing the Line: "No!" to Nuclear Power • Nuclear Waste: The Common Sense Solution • Entering the Nuclear Den: Debating History, Technology and Ideology • Going for Broke: Uranium-Nuclear Alliance Distorts Energy Options • Inside the Nuclear Industry's Trojan Horse: The Saskpower-AECL MOU • The Dark Side of Nuclear Politics: One Last Go at the Inquiries • Global Education on the Nuclear Controversy • Diseconomics of the Nuclear Industry: Inefficiencies, Inflated Demand and Hidden Costs • Out of the Nuclear Closet: With a Small Green Plan • Our Deadly Secret: Saskatchewan's Continuing Role In Nuclear Weapons
